

Self-Research Assignment #1

Topic: font-family

Name: _____

Date: _____

Your Mission

Find out how to change the font of text on a webpage using CSS. Then try it out!

Step 1 — Research

Use Google, W3Schools, or MDN to find out about font-family. Try searching:

"CSS font-family" or "how to change font in CSS"

Step 2 — Write What You Learned

What does the font-family property do? Write in your own words:

Write the CSS code you found that changes a font:

```
p {  
  font-family: _____ ;  
}
```

Step 3 — Think About It

Name 3 font families you found:

1. _____ 2. _____ 3. _____

What happens if the browser doesn't have your font? How do you give it a backup font?

Step 4 — Bonus Challenge

Use Google Fonts (fonts.google.com) to add a special font to a webpage. Write the <link> tag you would need:

<input checked="" type="checkbox"/> I tried this in my code: <input type="checkbox"/> Yes <input type="checkbox"/> Not yet	 How confident do you feel? <input type="checkbox"/>  <input type="checkbox"/>  <input type="checkbox"/>
