

Self-Research Assignment #4

Topic: CSS classes and IDs

Name: _____

Date: _____

Your Mission

Find out the difference between a CSS class and a CSS ID, and when to use each one.

Step 1 — Research

"CSS class vs id" or "HTML class attribute"

Step 2 — Fill In The Table

	CLASS	ID
HTML symbol used (. or #)		
Can be used on many elements?		
Example HTML code		
Example CSS selector		

Step 3 — Think About It

If you want to style ALL the buttons on a page the same way, would you use a class or an ID? Why?

Bonus Challenge

Write HTML for a paragraph with a class called 'highlight', then write the CSS to give it a yellow background:

HTML: < p class= " _____ " > Hello! </p>

CSS: . _____ { background-color: _____ ; }

☒ I tried this in my code: ☐ Yes ☐ Not yet

How confident do you feel? ☐  ☐  ☐
